

# The Periodic Table of Elements

Spark your students' interest in Science with our free online periodic table interactive game, posters and resources.

We want to help you inspire your students to explore the periodic table in a new way. Our resources are curriculum linked and perfect for pupils working independently from home.

Will new elements be added in the future?  
New, super-heavy elements will be added to the table when they are discovered. Scientific researches are already trying to create element 119 and 120 in the first row addition may be coming soon!

Now take the Periodic Table Challenge online at [bp.com/bpes/periodic-table](http://bp.com/bpes/periodic-table)

The Actinides (atomic numbers 90-103) have been omitted

Elements 113 to 118 are the most recently discovered elements. They are highly radioactive, exist for only a fraction of a second and only a few atoms of each have ever been made.
