Distance Learning

Striving for Excellence

Use our step-by-step guide to get started with the Distance Learning Programme

1 Access the login page

- Click the login icon (see image on right) at the top of the Beacon Hill Academy website page or click here.

2 Enter login details

- Enter Learner username and password (same ones used at school).
- The username is the same as the learner's email.
- Eg, Joe Bloggs (surname, first name initial)
  → bloggsj@beaconhillacademy.org.uk
- If the learner has not logged on to a school computer this academic year, their password will be their date of birth in the format **bha-DD/MM/YYYY**
- For example: 1 September 2024 → **bha-04/06/2024**

3 Open the learner portal

- Once logged in, learners will see the Go Launchpad page.
- Click on Learner Portal.

4 Access distance learning

- From the Learner Portal, click on the Distance Learning section.
- You will see five sections, one for each year group.

5 Follow your timetable

- Learners should select their year group and follow their normal school timetable by clicking on the subject they would usually have at that time.
- All subject work links directly to what is being studied in school this term.
- Learners should work through lessons in order, starting from Lesson 1
- Spend at least one hour per subject (each lesson is designed to last one hour)

6 Complete each lesson

- Each lesson includes four sections:
  1. Introduction - 2. Starter quiz - 3. Lesson video - 4. Exit quiz
- Learners should work through the lesson independently and pause the video where needed to complete tasks and checks for understanding.
