

23<sup>rd</sup> December 2020

Dear Parent /Carer,

### **COVID-19 Confirmed Case**

I have been informed that a learner has had a confirmed case of COVID-19. This learner was in school on Thursday 17<sup>th</sup> December 2020 and all those that have had 'direct or close' contact with the confirmed case have already been identified and instructed to self-isolate for 10 days.

We know that you may find this concerning, but we are continuing to monitor the situation and are working closely with Public Health England. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

I have already worked with Public Health Protection Team and with the Department for Education (DfE) to take the necessary steps to ensure that all staff and learners are safe.

### **What to do if your child develops symptoms of COVID 19**

If your child develops symptoms of COVID-19, they must remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test-or-by-calling-119>.

All other household members who remain well, must stay at home and not leave the house for 10 days. This includes anyone in your 'Support Bubble'.

Further information is available at: <https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronaviruscovid-19-infection>

Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

## Symptoms

The most common symptoms of coronavirus (COVID-19) are the recent onset of:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness. If your child does develop symptoms, you can seek advice from the [nhs.uk](https://www.nhs.uk) website at

<https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirussymptoms/>. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

## How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

### Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Should you have any further question please email [helpline@beaconhillacademy.org.uk](mailto:helpline@beaconhillacademy.org.uk).

Yours sincerely

**Mr S Dhani**
